

Hi-Res headphones. Certified to blow you away.

AKG N25 headphones place awesome Hi-Res audio right between your ears, with two perfectly tuned dynamic drivers providing a warm bass response, as well as rich mids and crystal-clear highs. But while these are engineered for award-winning sound, they're also designed for comfort. The acoustic tube is tilted to take the shape of your ear, and super-soft silicon ear-tips (in 4 different sizes) ensure the headphones fit snugly. Attached to this comes a tangle-free fabric cable with a universal remote/microphone that puts playback and call controls right at your fingertips, keeping you connected with all your music.

FEATURES

- ▶ Hi-Res Audio Support
- ▶ Dual Dynamic Drivers
- ▶ Tangle-Free Fabric Cable

FEATURES AND BENEFITS

► Hi-Res Audio Support

Thanks to Hi-Res audio support that support playback up to 40kHz, you can now capture all the details hidden in a music track – from the subtleties of an instrument to a barely-whispered lyric – and enjoy sound as the musicians and engineers originally intended it.

► Dual Dynamic Drivers

A result of AKG's award-winning acoustic expertise, these perfectly tuned dual dynamic drivers can reproduce a wide spectrum of sound frequencies: a warm bass response as well as crystal clear highs and mid-range notes.

► Tangle-Free Fabric Cable

A tangle-free cable constructed from high-quality fabric keeps you totally liberated, while placing playback and call controls right at your fingertips.
